

JOB DESCRIPTION

WEB DEVELOPER

Policy Briefcase is looking for an outstanding Web Developer to be responsible for the coding, innovative design and layout of our projects. Web developer's responsibilities include building the website from concept all the way to completion from the bottom up, fashioning everything from the home page to site layout, use interface and function.

The web developer would be required to work from home on his/her own software.

Capabilities

- Should have an experience in both front end and back end logic.
- Should have a minimum experience of 2 years or equivalent body of work.
- Should have experience in designing a news website or an online platform.
- Should have excellent design skills for the front end.
- Should be comfortable in working on all diverse codes – WordPress, HTML, PHP/CSS et al.
- Should have a Bachelor's degree in Computer Science or Computers or an equivalent certificate course or experience.

Operations

- Writing well designed, testable, efficient code by using appropriate software development practices.
- Website and software application designing, building, or maintaining.
- Using scripting or authoring languages, management tools, content creation tools, applications, and digital media.
- Directing or performing Website updates.

- Developing or validating test routines and schedules to ensure that test cases mimic external interfaces and address all browser and device types.

Aside from these skills, there are a number of qualities to be highlighted in a Web Developer job description to ensure the most suitable candidates apply:

- Thorough functional knowledge and coding experience
- Basic knowledge of Search Engine Optimisation (SEO) and adept in coordinating with the SEO Executive.
- Ability to multitask with strict time constraints, budgets and business goals.
- Strong communication skills.

Please send in your CV's along with a small email on why do you think you are interested in this position at admin@policybriefcase.com
